Whether you prefer subtle shades or bold hues, our colors are designed to bring out the best in your exhibits, enhancing their visual appeal and drawing in the attention of viewers.

Ultraviolet Protection for Longevity

Exposure to ultraviolet (UV) light can cause fading and damage to many materials, including those used in display cabinets. That's why JAFFA's acrylic sheets are specifically engineered to be UV-proof. This feature ensures that your exhibits remain protected from harmful UV rays, preserving their color and integrity over time. With JAFFA's acrylic sheets, you can display your items with confidence, knowing that they'll look as good as the day they were first placed in the cabinet.

Frosted Finish for Enhanced Clarity and Glare Reduction

Our custom colored acrylic sheets feature a frosted finish that not only adds a touch of elegance to your display cabinet but also helps to reduce glare. This matte surface diffuses light, creating a soft and even illumination that showcases your exhibits in their best light. The frosted finish also eliminates distracting reflections, allowing viewers to focus solely on the beauty of your displays.
