

Aluminum Hydroxide Translucent Resin Stone Panel For Transparent Bar Counter

Our Product Introduction

more products please visit us on custom-acrylicproducts.com

Basic Information

- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 500sets/Year

Product Specification

- Color: Custom Stone Texture
- Material: Resin + Aluminum Hydroxide
- Texture: Smooth / Matte
- Suitable For: Transparent Wall
- Resistance To Heat: High
- Resistance To Scratches: High
- Durability: High
- Resistance To Stains: High
- Highlight: seamless translucent quartz slabs, Bar Counter translucent quartz slabs, seamless Translucent Resin Stone

Product Description

Introducing our innovative Aluminum Hydroxide Translucent Resin Stone Panel, specifically designed for the creation of captivating transparent bar counters that redefine the boundaries of interior design and ambiance. This revolutionary material combines the strength and durability of aluminum hydroxide with the aesthetic versatility of translucent resin, resulting in a unique and stunning surface that is both functional and visually stunning.

Core Material: Aluminum Hydroxide

At the heart of our translucent resin stone panel lies aluminum hydroxide, a naturally occurring mineral compound known for its exceptional stability, fire resistance, and environmental friendliness. Its inclusion not only enhances the overall structural integrity of the panel but also contributes to its resistance to heat, moisture, and chemical degradation, ensuring long-lasting performance in even the most demanding environments.

Resin Infusion: Crafting Translucency

Carefully formulated translucent resins are infused into the aluminum hydroxide matrix, creating a seamless blend that allows light to pass through with a soft, diffused glow. This meticulous process results in a surface that is not merely see-through but also imbued with a subtle depth and warmth, enhancing the visual experience of any space it inhabits. The resin's translucent quality also facilitates the creation of striking light effects, transforming the bar counter into a dynamic focal point that captivates patrons and elevates the overall ambiance.

Design Versatility

Our Aluminum Hydroxide Translucent Resin Stone Panel offers unparalleled design versatility. Available in a range of customizable colors, textures, and thicknesses, it can be tailored to suit any design vision or aesthetic preference. Whether you seek a sleek, modern look or prefer a more organic, tactile finish, our panels can be crafted to match your unique style. Furthermore, the translucent nature of the material allows for the integration of LED lighting, creating mesmerizing backlighting effects that further amplify the visual appeal of your bar counter.

Durability & Maintenance

Designed with durability in mind, our panels are highly resistant to scratches, stains, and everyday wear and tear. Their non-porous surface makes cleaning and maintenance a breeze, ensuring your bar counter remains pristine and inviting for years to come.

Sustainability

At the forefront of our design philosophy lies a commitment to sustainability. By utilizing aluminum hydroxide, a natural and abundant resource, we minimize our environmental footprint while still delivering a premium product. Our translucent resin stone panels are a testament to the fact that beauty and sustainability can coexist harmoniously.

Support and Services:

Our Translucent stone product comes with comprehensive technical support and services to ensure that you get the most out of our product. Our support team is available to answer any questions and resolve any issues you may encounter. Our services include:

- Installation guidance and advice
- Product training and education
- Product maintenance and repair
- Warranty support
- Customization services

We are committed to providing exceptional support and services to our customers to ensure that their experience with our Translucent stone product is nothing short of excellent.

Packing and Shipping:

Product Packaging:

Each translucent stone product will be carefully wrapped in bubble wrap to prevent any damage during transportation. The wrapped stone will then be placed in a sturdy cardboard box with cushioning material to ensure its safety. The box will be sealed with packing tape and labelled with the product name and shipping address.

Shipping:

The product will be shipped via a trusted courier service to ensure timely and safe delivery. The shipping cost will be calculated based on the destination and weight of the product. The estimated delivery time will be provided to the customer upon confirmation of the order.
