### Description

- **Egg/Teardrop Artistic Form**

Crafted with acrylic heat-bending technology to create a smooth egg/teardrop-shaped enclosed window, integrating natural greenery with modern aesthetics to become an ecological art focal point in the space.

- **High-Clarity Weather-Resistant Acrylic Material**

Made of imported high-transparency, high-toughness acrylic panels with over 92% light transmittance. It is scratch-resistant and anti-yellowing, clearly displaying the internal micro-landscape while providing a stable growth environment for plants.

- **Closed Micro-Ecosystem**

Reserved ventilation and irrigation ports at the top/bottom to create a stable indoor micro-ecosystem, suitable for shade-tolerant plants such as ferns, mosses and tillandsia, realizing a "growing art installation".

- **Modular Structure Design**

Divided into acrylic transparent cover + metal/acrylic base, convenient for transportation, installation and later plant maintenance, ideal for hotel elevator lobbies, gallery entrances and office spaces.

- **Excellent Waterproof & Moisture-Proof Performance**

Acrylic is waterproof and moisture-proof, with a sealed base structure to avoid irrigation leakage, resisting deformation and cracking for long-term use in high-humidity indoor environments.

- **Stable Installation Structure**

Equipped with a weighted metal base or hanging 吊件, it can be placed on the floor or hung from the ceiling, with a stable structure to ensure the safety of the installation and plants.

- **Multi-Scene Adaptability**

Serves as an ecological decor in hotel elevator lobbies, a micro-landscape installation in galleries, a green decor in office spaces and an art exhibit in commercial windows, suitable for high-end hotels, art galleries and commercial spaces.

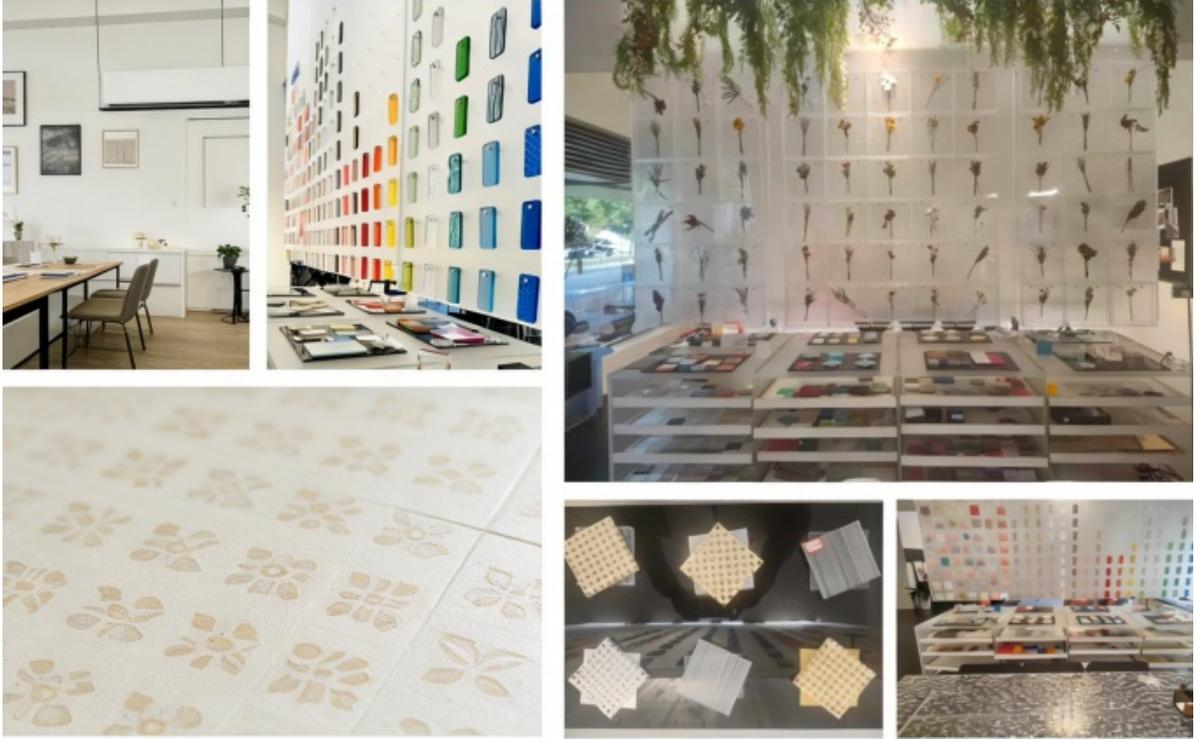

- **Eco-Friendly & Safe Craftsmanship**

Adopts laser precision cutting + fine polishing + heat bending molding, burr-free and odorless. The acrylic material complies with EU ROHS environmental standards, being friendly to humans and plants.
