

## Custom - made acrylic display cabinets Custom - made plexiglass special counters

Our Product Introduction

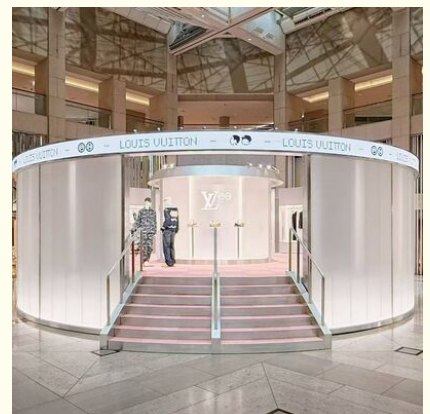

### Basic Information

- Place of Origin: CHINA
- Brand Name: JAFFA DESIGN PLASTIC
- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: T/T,D/P,L/C
- Supply Ability: 500sets/Year

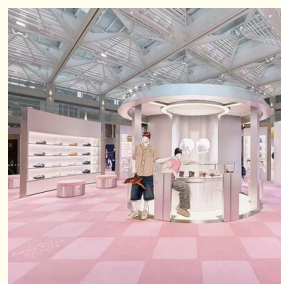

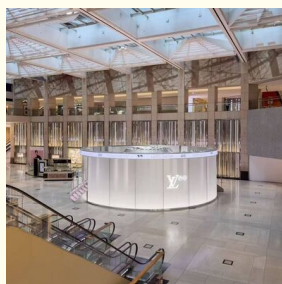

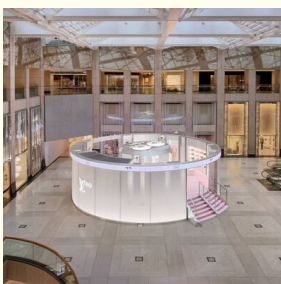

### Product Specification

- Highlight: custom acrylic display cabinets, plexiglass special counters, custom made acrylic products

## Product Description

### Custom-made Acrylic Display Cabinets & Plexiglass Special Counters

L\*V's custom-made acrylic pop-up space represents the perfect fusion of transparent texture and brand narrative. This innovative retail environment, crafted with custom acrylic as the core material, features soft curved enclosing structures and semi-transparent luminous facades that create an immersive space blending luxury with lightness.

#### Core Advantages of Custom Acrylic for Commercial Spaces

##### Highly Customized Visual Expression

Acrylic achieves diverse forms through processes including heat bending, frosting, UV printing, and backlighting. From curved curtain walls to luminous logos, it precisely matches brand visual language. The curved enclosing design of this pop-up store enhances LV's elegant texture while creating an "open yet private" spatial experience through semi-transparent materials, perfectly conveying the brand's concept of both inclusiveness and exclusivity.

##### Lightweight and Scenario Flexibility

At only half the weight of glass with superior impact resistance, acrylic enables large-scale curved shapes without complex load-bearing structures. This meets pop-up store requirements for quick construction and flexible disassembly. Compared to traditional materials, it significantly shortens construction timelines while reducing transportation and installation costs, allowing brands to quickly establish exclusive visual symbols across different commercial spaces.

##### Transparent Texture and Atmosphere Creation

The high light-transmittance and luminous properties of acrylic create richly layered lighting effects. Semi-transparent curtain walls present a soft hazy appearance under the interplay of natural and artificial lighting, protecting in-store display privacy while maintaining spatial breathability. Luminous logos and light strips enhance brand recognition, making visual focal points stand out naturally in public spaces.

##### Durability and Easy Maintenance

Acrylic surfaces resist dirt and scratches, requiring only soft cloth cleaning in daily use. The material resists yellowing or fogging over long-term use, maintaining visual texture stability in high-frequency commercial environments. For pop-up stores requiring frequent visual updates, this material ensures long-term aesthetic appeal while supporting subsequent scene renewal through printed content changes and lighting adjustments.
