## Product Description

### Custom-made Acrylic Art Chandeliers & Plexiglass Art Installations

Custom-made Acrylic Art Chandeliers and Plexiglass Art Installations designed to serve as the visual core of commercial spaces, combining lighting functionality with artistic decoration.

#### The Visual Core of Commercial Spaces

Designed specifically for clients who pursue sophistication and uniqueness in their spaces, these non-standard custom acrylic art chandeliers (in shapes of mountains or ribbons) serve as the crowning touch in commercial environments, perfectly integrating functional lighting with art installations.

### Core Design Highlights

#### Flowing Visual Tension

Using hundreds of acrylic panels as units, precise cutting and heat-bending techniques create undulating arcs. These are strung together in a staggered manner with metal hanging wires, forming suspended shapes resembling "flowing mountains" or "golden ribbons." This design breaks through the flatness of traditional chandeliers, allowing light and shadow to cascade through the transparent acrylic texture, creating a luxurious and dynamic visual hierarchy.

#### High-end Material Expression

Acrylic is selected for its combination of glass-like transparency with plastic's impact resistance. The material resists yellowing or fogging over long-term use. The gold-plating process on the surface provides warm metallic luster as light passes through, matching the luxurious tone of high-end spaces while avoiding the coldness of pure metal materials.

#### Full-scenario Customization Adaptation

Every aspect can be customized according to space requirements—from the size, arc, and color gradient of acrylic panels to the span, vertical height, and hanging density of the overall shape. Whether creating "undulating mountains" for hotel lobbies or "flowing ribbons" for sales offices, these installations accurately match spatial narratives and serve as three-dimensional carriers of brand concepts.
