Product Description

Custom-made Acrylic Colorful Art Installation

Custom-made Plexiglass Colorful Suspended Installation

This suspended installation, crafted with colorful acrylic as the core material, creates an immersive photo-taking experience in commercial spaces. Composed of thousands of iridescent acrylic unit pieces forming a grid structure, it is hung in a staggered manner to create a giant suspended shape resembling flowing clouds.

Colorful Acrylic Grid Suspended Installation

Infusing a Flowing Rainbow Fantasy into Commercial Spaces. When light passes through the colorful coating of the acrylic, ever-changing rainbow-colored light spots are projected onto the walls and floor. The entire space seems to be wrapped in shattered starlight, retaining the lightness and transparency of acrylic while creating a dreamy visual impact through the iridescent effect.

Commercial Value of Custom-made Acrylic Installations

Traffic Generator

This installation, with its "dreamy filter", is a natural photo-taking and sharing spot. Customers spontaneously take photos and share them, bringing social-fission-style exposure to shopping malls, art galleries, or brand exhibition halls. It transforms the space from a "pass-by type" to a "destination type".

Space Atmosphere Magician

It doesn't require complex lighting set-ups. With just natural light or basic illumination, it produces dynamic light and shadow changes. During the day, sunlight creates rainbow-colored light spots on the floor. At night, warm lighting presents a neon texture, allowing the space atmosphere to change naturally with time and meeting diverse scenario needs.

Highly Adaptable Customization Solutions

The lightweight and malleable nature of acrylic allows the installation to be freely adjusted according to space size, floor height, and brand tone. Whether creating a giant suspended cloud spanning an entire atrium or a small-scale art installation in a local area, it can be accurately implemented with short construction periods and low maintenance costs.

Visual Representation of Brand Concepts

The iridescent and gradient visual effects perfectly echo brand tones of "youthful, trendy, and futuristic", while the flowing form conveys spatial concepts of "openness and inclusiveness". This makes the installation not just decoration but a visual language for brands to communicate with consumers.
