Description

- **Artistic Chinese Pavilion Design:** Centered on traditional Chinese pavilion architecture, this piece adopts modular acrylic splicing technology to replicate classic elements like overhanging eaves, brackets and columns, integrating Eastern aesthetics with modern space to create a highly recognizable spatial art focal point.
- **High-Clarity Acrylic Material:** Crafted from imported high-transparency, high-toughness acrylic panels with over 90% light transmittance. The light refraction creates a crystal-clear visual effect, enhancing spatial texture during the day and crafting a dreamy immersive atmosphere at night when paired with the lighting system.
- **Modular Assembly Structure:** The overall design features modular sectional construction, detachable into columns, beams, eaves and other components for easy transportation, installation and maintenance, ideal for large spaces such as exhibition halls and hotel lobbies.
- **Built-in Lighting System Compatibility:** Comes with pre-reserved professional lighting installation ports, compatible with warm white/cool white/RGB LED strips and projection lights to realize various dynamic effects such as color changing, contour lighting and dynamic projection, enhancing the display's expressiveness.
- **Waterproof & Durable:** Acrylic offers excellent water resistance, moisture-proof and acid-alkali corrosion resistance. Paired with sealed connectors and moisture-proof power supplies, it operates stably in high-humidity indoor environments, resisting yellowing, deformation and cracking for long-term use.
- **Stable & Safe Installation:** Equipped with thickened acrylic columns + invisible metal support structure, with a weighted base and reinforced parts at the bottom. The structure is wind-resistant and fits seamlessly with the ground to ensure the safety of personnel and the installation.
- **Multi-Scene Adaptability:** Serves as a core exhibit in gallery exhibition halls, visual merchandising in hotel lobbies, cultural tourism check-in spots and public art installations, suitable for art exhibitions, cultural tourism displays and high-end commercial spaces.
- **Eco-Friendly & Safe Craftsmanship:** Adopts laser precision cutting + fine polishing + heat bending molding, burr-free and odorless. The acrylic material complies with EU ROHS environmental standards, being friendly to humans and the environment.
