## Product Description

### JAFFA DESIGN PLASTIC Custom Acrylic Side Tables: Break Material Limitations, Reshape New Expressions of Home Aesthetics

Crafted by **JAFFA DESIGN PLASTIC**, our custom acrylic side tables are a high-quality choice for high-end homes and commercial spaces, and an ideal solution to break the limitations of traditional glass side tables. Compared with glass, which is heavy, fragile and limited in customization, we select premium acrylic raw materials, integrating lightweight and transparent aesthetic texture, stable and durable performance with unlimited customization possibilities. It not only avoids many pain points of glass side tables, but also realizes every creative and personalized demand you have for furniture, becoming a focal point that combines appearance and strength.

#### Core Advantages (Compared with Glass, Highlighting Acrylic's Unique Value)

##### 1. More Durable Than Glass, Safe and Worry-Free

Compared with the pain points of glass side tables—fragile, easy to break and hurt people when impacted, and sharp edges—JAFFA acrylic side tables are 20 times more impact-resistant than glass, not easy to break, without sharp edges, and safer to use; at the same time, they are only half the weight of glass, making transportation and installation more convenient, no need to worry about the inconvenience caused by heavy materials, suitable for various space layouts.

##### 2. JAFFA Premium Acrylic, Timeless and Non-Fading

We adhere to the selection of high-end acrylic raw materials. Different from ordinary acrylic which is easy to yellow, crack and has poor weather resistance, JAFFA custom acrylic side tables have excellent anti-yellowing, anti-cracking and anti-ultraviolet properties. Even when exposed to light and daily use for a long time, they always maintain a clear and transparent texture, without yellowing, deformation or fading, far exceeding the durability of glass side tables. One choice, long-term freshness.

##### 3. Unlimited Customization, Turning Every Creativity Into Reality

Limited by material characteristics, glass side tables are extremely difficult to customize in shape, color and size, making it difficult to meet personalized needs; while JAFFA acrylic side tables support full-link customization, fully fitting your creative ideas:

- 1**Size and Shape: Can be customized into round, square, irregular and freeform shapes, suitable for coffee tables, side tables, corner tables, display tables and other uses, accurately fitting the space size;
- 2**Color and Texture: Choose from hundreds of options, including fully transparent, semi-transparent, frosted, iridescent gradient, solid matte, stone-like and wood-like textures, breaking the limitation of single transparency of glass;
- 3**Detail Creativity: Can embed patterns, laser engrave, match luminous effects, and even combine your brand elements or personal preferences to create a unique exclusive side table, making furniture an extension of personality.

##### 4. Transparent Aesthetics + Easy to Clean, Balancing Practicality and Appearance

Acrylic side tables have the same transparent texture as glass, but without the dazzling reflection of glass. When light passes through, it is softer, adding a light and high-end feeling to the space; at the same time, the surface is smooth and stain-resistant, not easy to accumulate dust and water stains, and can be cleaned with a soft cloth daily. No need to take frequent care and worry about scratches like glass side tables, balancing aesthetics and practicality.
