Basic Information

- Place of Origin: CHINA
- Brand Name: JAFFA DESIGN PLASTIC
- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: L/C,D/P,T/T
- Supply Ability: 500sets/Year

Product Specification

- Material: Colored Acrylic
- Craftsmanship: Laser Cutting, Heat-bending, Polishing, Laser Engraving
- Color Options: Clear, Light Pink, Mint Green, Lake Blue, Amber Orange, Gradient Colors (Pantone Colors Customizable)
- Application Scenarios: Home Decoration, Floral Display, Brand Gifts, Commercial Display, Wedding Arrangements
- Packaging: Shockproof Foam + Custom Color Box (optional)
- Service: OEM/ODM

Product Description

JAFFA Custom Acrylic Vases Acrylic Home Decor

Redefine home aesthetics with modern design, and illuminate living spaces with transparent colors.

We abandon the heaviness of traditional ceramics and select food-grade high-transparency acrylic. Through precision cutting and heat-bending processes, we create vases that are both artistic and practical. Each piece is as transparent as stained glass, presenting dreamy light and shadow effects under light refraction. It is not only a container for flowers but also an independent home art piece.

- **Design Highlights:** Minimalist geometric contours, rounded arch and circular shapes, paired with gradient or solid transparent colors, easily adapting to modern, Nordic, light luxury and other home styles.
- **Material Advantages:** Food-grade acrylic, non-toxic and odorless, shatter-resistant and durable, lighter and safer than glass, and easy to maintain daily.
- **Customization Value:** Supports full-dimensional customization of color, size, logo engraving, etc. Whether as brand gifts, home soft furnishings, or commercial space displays, it can perfectly fit your unique needs.

| Parameter Item | Optional Range/Description |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Shape Selection | Arch style / Round style / Geometric splicing style (customizable with CAD drawings) |
| Size Customization | Height: 15-40cm; Width: 10-30cm; Thickness: 3-8mm (adjusted according to structure) |
| Color Selection | Solid colors: clear, white, black, pink, blue, green, orange, etc.; Gradient: dual-color/tri-color gradient (color card reference provided) |
| Surface Treatment | High polish (mirror effect) / matte (matte texture) |
| Logo Customization | Laser engraving (internal/external) / silk screen printing / UV printing (position, size, color customizable) |

FAQ

Q1: What are the advantages of acrylic vases compared to glass vases?

A: Acrylic is lighter than glass, less prone to breakage, and safer. Its light transmittance is close to that of glass, with a transparent texture. It has strong weather resistance, is not easy to yellow, and is easier to clean daily, making it suitable for families with children or pets.

Q2: Can I customize Pantone color numbers?

A: Yes. We support color matching based on the Pantone color card provided by customers to ensure accurate color matching for brand visuals or space design needs.

Q3: What are the ways to customize the logo? Which one is more recommended?

A: We offer three methods: laser engraving (internal/external), silk screen printing, and UV printing. Laser engraving has a high-end texture and is not easy to wear, suitable for high-end gifts; silk screen printing and UV printing have bright colors, suitable for brand promotion.

Q4: Can acrylic vases hold water?

A: Yes. Our vases adopt a seamless pasting process, which is waterproof and leak-proof, and can be directly used for hydroponic flowers. It is recommended to avoid holding hot water for a long time to avoid affecting the material life.

Q5: What is the customization process?

A: 1. Provide design requirements or reference images → 2. We issue CAD drawings and quotations → 3. Confirm and make samples → 4. Customer confirms samples → 5. Mass production → 6. Quality inspection and delivery.
