

Custom Acrylic Stool Custom Acrylic Shoe Changing Bench

Our Product Introduction

for more products please visit us on custom-acrylicproducts.com

Basic Information

- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: L/C,D/P,T/T
- Supply Ability: 500sets/Year

Product Specification

- Material: PMMA
- Color: Customizable
- Standard Size: Customizable
- Craftsmanship: One-piece Seamless Heat Bending, Laser Precision Cutting, Edge Chamfering And Polishing, Multi-layer Gradient Dyeing
- Application: Home
- Service: OEM/ODM

Product Description

JAFFA Custom Gradient Acrylic One-Piece Stool

Redefines everyday furniture with modern artistic aesthetics, blending high-transparency acrylic material with pioneering gradient color technology to create a space item that combines visual impact and practical function.

This stool adopts **one-piece seamless heat-bending craftsmanship**. The entire thickened acrylic sheet is precisely heat-bended at controlled temperatures, with no splicing gaps, and features smooth and rounded lines. The C-shaped wave support structure not only ensures stable load-bearing but also presents a light and transparent visual effect, breaking the heaviness of traditional furniture.

In terms of color, we use **multi-layer gradient dyeing technology**, transitioning from warm orange-red at the top to bright yellow, emerald green on the sides, and deep blue at the bottom. The rainbow-like gradient layers create a flowing light and shadow texture under light refraction. It is not only a practical seat but also an art installation in the space, easily adapting to various home and commercial space styles such as modern, light luxury, minimalist, and artistic.

Made of food-grade high-transparency acrylic (PMMA) with a thickness of 8-12mm, it is shatter-resistant, waterproof, scratch-resistant, and easy to clean. Lighter and safer than traditional wood or ceramic furniture, it is especially suitable for humid scenes such as bathrooms and balconies, and can also be used as a living room side table, bedroom dressing stool, commercial space display stool, etc.

For B-end and high-end customization needs, we support full-dimensional customization: adjust the size (height 30-45cm, countertop 25-40cm) according to the space design plan, customize exclusive gradient colors (match Pantone color numbers, adjust gradient direction and layers), add brand LOGO laser engraving (internal/external engraving), and even customize special-shaped support structures to meet personalized needs such as brand gifts, space soft furnishings, and art installations.

JAFFA DESIGN PLASTIC uses precision craftsmanship and innovative design to make every acrylic furniture a visual focal point in the space, injecting a transparent and dynamic artistic atmosphere into modern life.

Parameter Item	Optional Range/Detailed Description	Remarks for B-end Customers
Material Specification	1. Food-grade high-transparency acrylic: 8mm (commonly used), 10mm, 12mm; 2. Customizable to 15mm thick (reinforced model) or 6mm thin (lightweight model); 3. Customizable flame-retardant and scratch-resistant acrylic (for special scenarios)	Material unit price discount available for bulk customization, free material test report provided
Size Customization	Regular size: Height 35cm, countertop 30*25cm; Customizable range: Height 30-45cm, countertop 25-40cm (length and width can be adjusted on demand)	CAD drawings provided for confirmation, free modification (before production starts)
Color Customization	1. Gradient models: Rainbow gradient, two-color/three-color gradient, gradient direction adjustable; 2. Solid color models: Transparent (default), white, black, blue and other regular colors; 3. Can match the Pantone color number specified by the customer	No additional color mixing fee for bulk orders (≥50 pieces), a small color mixing fee required for small-batch trial orders
Brand Customization	Craftsmanship: Laser internal/external engraving LOGO, silk screen brand information, UV printing; Position: Stool surface, stool leg side (selectable on demand); Size: No more than 15% of the product surface area	No additional craftsmanship fee for bulk orders, free LOGO design optimization service provided
Structure Customization	1. Regular model: C-shaped wave support (stable and light); 2. Reinforced model: Thickened stool legs, additional support points; 3. Special-shaped model: Custom special shapes on demand (design drawings required)	MOQ ≥ 100 pieces for special-shaped models, sampling time extended to 7-10 days
Minimum Order Quantity (MOQ)	Regular model: 30 pieces (trial order), 50 pieces (bulk wholesale); Reinforced/gradient model: 50 pieces起; Special-shaped model: 100 pieces起	Tiered wholesale discount available for MOQ ≥ 200 pieces, production prioritized
Lead Time	Sampling: 5-7 days (regular model), 7-10 days (special-shaped/special custom model); Bulk production: 10-20 days (delivery within 15 days for less than 500 pieces); Rush order: Fastest 7 days (rush fee required)	Real-time production progress feedback provided for bulk orders to ensure on-time delivery
Packaging Customization	Regular: Pearl cotton + hard carton (shockproof, reducing transportation damage); Custom: Color box, flip-top box packaging (can print brand LOGO, contact information)	Design draft confirmation required for packaging customization, packaging discount available for bulk orders

FAQ

Q1: Can samples be provided for bulk procurement? What are the sample fee and lead time?

A: Samples are available. The sample fee for regular models is 50-100 yuan/piece (adjusted according to size and material), and 100-300 yuan/piece for special custom models (special-shaped, gradient). The sample fee can be fully deducted from the subsequent bulk order (order quantity \geq MOQ). The sample lead time is 5-7 days (regular model) and 7-10 days (special model).

Q2: Does the product material meet high-end commercial qualifications? Can relevant certificates be provided?

A: All products are made of food-grade high-transparency acrylic, complying with national GB/T 7134-2008 environmental standards, non-toxic, odorless and formaldehyde-free. Material test reports and environmental protection qualification certificates can be provided, suitable for commercial scenarios with qualification requirements such as maternal and infant products, beauty, and high-end hotels, helping customers enter supermarkets and operate in compliance.

Q3: How to handle damage during bulk transportation?

A: Shockproof pearl cotton + thickened hard carton packaging is adopted, and the damage rate during bulk transportation is controlled within 1%. Customers need to check and verify within 3 days after receiving the goods. After confirming the number of damaged products, we will freely reissue the corresponding number of products (no cost to the customer). If the damage rate exceeds 1%, we can negotiate reissue or deduct the corresponding payment.

Q4: Can the order be modified after confirming the customization parameters? Is there any additional fee for modification?

A: After the order is confirmed, if production has not started, all customization parameters (size, color, LOGO, etc.) can be modified free of charge. If production has started, it needs to be negotiated according to the production progress. If material and craftsmanship loss occurs, a small loss fee will be charged (the specific amount will be confirmed in advance). It is recommended that customers check the CAD drawings in advance to avoid repeated modifications affecting the lead time.

Q5: What are the payment methods for B-end bulk orders? Is installment payment supported?

A: Two payment methods are supported: 1. Regular payment: Prepay 30% deposit. After production is completed, the customer inspects the sample (or real-shot picture). After confirmation, pay 70% balance, and the goods will be shipped after the balance is received. 2. Long-term cooperative customers (more than 3 bulk purchases): Installment payment can be applied (prepay 20%, and pay the balance within 30 days after shipment), which can be negotiated in detail.

Q6: Is OEM service available? What conditions need to be met for OEM?

A: OEM service is supported. Customers can provide their own brand LOGO and product label design draft, and we are responsible for printing/engraving the LOGO on the product and packaging, with no additional OEM fee. OEM needs to meet the corresponding MOQ requirements (≥ 50 pieces for regular models, ≥ 100 pieces for special-shaped models). Long-term OEM can provide label design optimization and integrated packaging customization services.

Q7: What is the service life of the product? How to guarantee after-sales maintenance?

A: Under normal commercial scenarios (avoid scratching by sharp objects and high-temperature exposure), the service life of the product can reach 3-5 years. Bulk orders provide 1-year free after-sales maintenance service (non-man-made damage, such as splicing cracks, material yellowing and other quality problems), and the logistics cost for maintenance is borne by us. After more than 1 year, paid maintenance service can be provided (a small amount of material and craftsmanship fee is charged).
