Product Description

Product Description (Short Paragraph)

Acrylic backlit illuminated letters feature stainless steel precision characters as the skeleton, paired with a high-transparency acrylic backboard and built-in LED backlight modules. By day, they are exquisite metal logos that subtly showcase brand quality; by night, soft backlight emanates from the acrylic backboard, creating a floating visual effect that enhances brand recognition and sophistication in the dark, making them the first choice for high-end stores and corporate identity walls.

Product Attributes (Bullet Points)

- Core Materials: 304/316 stainless steel precision characters + high-transparency acrylic backboard + LED backlight modules
- Craftsmanship: Precision carving and welding, polishing and brushing, acrylic heat bending, backlight module embedding
- Light Effects: Single-color backlight (white/warm yellow/cool white), borderless floating light effects
- Application Scenarios: Brand storefronts, reception identity walls, exhibition guides, corporate LOGO walls, high-end hotel signs
- Installation Methods: Wall-mounted (floating/borderless), recessed

Customization Parameters Table

Parameter	Options/Specifications
Single Character Height	20cm–300cm, extra-large sizes available for storefronts
Font Styles	Sans-serif, serif, artistic fonts (vector files required)
Metal Materials	304 stainless steel (brushed/mirror), aluminum alloy (electrophoretic/painted), brass (vintage texture)
Backlight Colors	White, warm yellow, cool white (RGB backlight available for customization)
Floating Distance	1cm–5cm (adjustable based on spatial effects)
Waterproof Rating	IP65 (IP68 enhanced waterproof available for outdoor storefronts)

FAQs (Focused on Selling Points)

1. Is floating installation secure?

Yes. We use stainless steel invisible hanging brackets and expansion screws fixed through professional structural calculations, capable of withstanding 10 times their own weight, remaining stable even in strong winds.

2. Can backlight brightness be adjusted?

Yes. Stepless dimming is supported, allowing brightness adjustment for day/night scenarios to ensure recognition while avoiding light pollution.

3. Will the acrylic backboard yellow when used outdoors?

Our imported UV-resistant acrylic raw materials ensure no yellowing or deformation for over 10 years of outdoor use, with backlight effects remaining as new.
