

Acrylic 3D Floating Store Sign Lightweight Premium Expression Of Brand Image

Basic Information

Product Specification

- Highlight: Acrylic 3D Floating Store Sign, Lightweight acrylic storefront sign

Product Description

Product Description (Short Paragraph)

Acrylic 3D floating store signs use high-transparency acrylic panels as the main body, with floating installation and minimalist design to "float" brand logos on building facades. Abandoning the heaviness of traditional store signs, they convey brand tonality with light and transparent texture, becoming exquisite visual focal points by day and more sophisticated under lighting at night, making them the first choice for coffee shops, boutiques, designer brands, and other quality-focused stores.

Product Attributes (Bullet Points)

- Core Materials: High-transparency acrylic (5mm–20mm) + stainless steel invisible hanging brackets + LED backlight/side-lighting modules
- Craftsmanship: Laser cutting, CNC precision carving, seamless splicing, floating installation
- Visual Effects: 3D floating, borderless design, high-transparency texture, dual effects day and night
- Application Scenarios: Coffee shops, boutiques, designer brand stores, boutique homestays, cultural and creative spaces
- Installation Methods: Wall-mounted (floating 1cm–5cm), recessed, suspended

Customization Parameters Table

Parameter	Options/Specifications
Overall Dimensions	Width 50cm–300cm, Height 30cm–150cm, extra-large sizes available for customization
Acrylic Thickness	5mm (lightweight), 10mm (balanced texture), 20mm (heavy premium)
Floating Distance	1cm–5cm (adjustable based on building facade visual effects)
Lighting Configuration	No light (pure logo), LED backlight (floating effect), LED side-lighting (3D effect), RGB iridescent (dynamic effect)
Surface Treatment	High-transparency, frosted, UV printing (brand LOGO/text), silk screen printing (minimalist texture)
Waterproof Rating	IP65 (IP68 enhanced waterproof available for outdoor stores)

FAQs (Focused on Selling Points)

2. Is floating installation secure?

Yes. We use 304 stainless steel invisible hanging brackets and expansion screws fixed through professional structural calculations, capable of withstanding 10 times their own weight, remaining stable even in strong winds without affecting visual effects.

3. Can LOGOs and text be printed on the acrylic surface?

Yes. UV high-definition printing (high color reproduction for complex patterns) and silk screen printing (delicate texture for minimalist text) are supported, with no fading or peeling for over 5 years of outdoor use.

4. Will acrylic yellow or atomize when used outdoors?

Our imported UV-resistant acrylic raw materials ensure no yellowing or atomization for over 10 years of outdoor use, maintaining high-transparency texture and consistent backlight/side-lighting effects.
