

Acrylic Modular Display Stand – Modular Storage for Flexible Spaces

Our Product Introduction

Basic Information

- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: L/C,D/P,T/T
- Supply Ability: 500sets/Year

Product Specification

- Material: PMMA
- Standard Size: Customizable
- Color: Customizable
- Feature: Luminous
- Service: OEM/ODM
- Application: Mall/Restaurant/Office/Home/Exhibition/Guardrail
- Highlight: **plexiglass stands, custom acrylic stand, clear display stands**

Product Description

Product Description (Short Paragraph)

Acrylic modular display stands center on standardized modules, supporting free splicing, stacking, and combination to create exclusive storage display systems. No longer single display stands, they are "Lego-style" space solutions – horizontally spliced into display walls, vertically stacked into storage towers, and paired with diverse modules (drawer-style, open-style, lit-style) to adapt to spaces from desktops to entire walls, ideal for toy collectors, cultural and creative studios, and commercial displays.

Product Attributes (Bullet Points)

- Core Materials: High-transparency acrylic (3mm–5mm) + standardized splicing buckles + multi-functional modules (drawer/lit/open)
- Craftsmanship: Modular cutting, precision buckle design, seamless splicing, waterproof and dustproof treatment
- Visual Effects: Free combination, flexible adaptation, standardized unity, scalable upgrade
- Application Scenarios: Toy collection walls, cultural and creative product displays, commercial window 陈列, studio sample storage
- Installation Methods: Desktop placement, wall-mounted (spliced into walls), floor-standing (stacked into towers), display case recessed (optional)

Customization Parameters Table

Parameter	Options/Specifications
Module Dimensions	Standard module: 30cm*30cm*15cm, mini module: 15cm*15cm*10cm, extra-large module: 60cm*60cm*30cm
Module Types	Open module (display collections), drawer module (store accessories), lit module (night display), dustproof module (protect collections)
Splicing Methods	Horizontal splicing (infinite extension into display walls), vertical stacking (up to 10 layers, adjustable by load), L-shaped combination (adapt to corner spaces)
Buckle Materials	Food-grade silicone buckles (odorless, secure splicing), stainless steel buckles (for large combinations, stronger load-bearing)
Expansion Functions	LED light strips (series connection between modules for overall illumination), label slots (mark collection information), locks (protect valuable collections, optional)
Load Capacity	Standard module supports 10kg per layer, stainless steel buckle combination supports 20kg per layer (adjustable by size)

FAQs (Focused on Selling Points)

2. Are there obvious gaps in modular splicing?

No. High-precision laser cutting ensures splicing gaps $\leq 0.5\text{mm}$, visually seamless for a cohesive look ideal for full-wall display walls.

3. Can modules be expanded later, e.g., adding lit modules?

Yes. All modules use standardized buckles, allowing easy addition or replacement without disassembling existing combinations for flexible upgrades.

4. For commercial displays, can brand LOGOs be customized?

Yes. UV printing or laser engraving of brand LOGOs on module surfaces is supported, turning display walls into extensions of brand identity.
