Product Description

Product Case Description (Short Paragraph)

Commissioned for a modern urban apartment, this custom walk-in closet project highlights JAFFA's mastery in combining acrylic's decorative properties with practical wardrobe functionality. The client sought a semi-open storage solution that balanced visual openness with privacy, while maximizing space in a compact bedroom-dressing area. We engineered a system featuring **fluted acrylic privacy panels** (side profile) paired with **10mm ultra-clear acrylic sliding doors**, all framed in matte black aluminum alloy for a sharp, contemporary contrast. The semi-open design keeps daily-wear clothing visible and accessible, while the fluted acrylic adds texture and visual depth without sacrificing light transmission. This project exemplifies how JAFFA's one-stop customization turns space constraints into a stylish, highly functional dressing solution tailored to modern city living.

Customization Parameter Table (Project & Service Specifications)

Parameter Category	Project Customization Details	JAFFA Full Service Range
Core Material	10mm ultra-clear acrylic (sliding doors), 8mm fluted acrylic (privacy panels), matte black aluminum alloy (frames)	100+ acrylic variants (fluted, clear, frosted, tinted; 3mm–12mm thickness); metal framing (black/white/chrome/gold)
Overall Dimensions	Customized to 3.8m (W) * 0.6m (D) * 2.6m (H) (wall-mounted semi-open closet)	Custom size: 1.8m*0.5m (compact) to 5.0m*0.8m (full wall); corner/built-in/standalone layouts supported
Structure Design	Semi-open modular frame, sliding acrylic doors, double hanging rods, integrated storage bins	10+ structural templates (semi-open, fully enclosed, walk-in, reach-in, sliding/fix door)
Surface Treatment	Fluted acrylic finish, ultra-clear high-gloss acrylic, matte black powder coating (frames)	Polishing, sandblasting, UV printing, laser engraving, metal plating, wood veneer inlays
Accessory Configuration	Soft-close sliding tracks, anti-derailment system, built-in hanging rods, plastic storage bin compatibility	Integrated LED strip lighting, jewelry drawers, pull-out shoe racks, tie/belt hangers, lockable door options
Service Cycle	Design confirmation: 3 days; Production: 18 days; Installation: 3 days	Design: 1–5 days (3D renderings); Production: 10–25 days; Global shipping + installation hardware

Core Selling Points & Customization Advantages (Bullet Points)

- 1. One-Stop Bespoke Solution:** End-to-end service from space measurement and 3D design to manufacturing, delivery, and professional installation—no third-party coordination required.
- 2. 100+ Material & Texture Options:** Specialized in fluted acrylic (various groove densities) and ultra-clear acrylic, paired with customizable metal framing to match any modern interior color scheme.
- 3. Semi-Open Space Optimization:** Balances open accessibility for daily items with the clutter-concealing function of sliding doors, ideal for compact urban apartments and master bedrooms.
- 4. Premium Aesthetic Contrast:** Matte black metal frames paired with fluted/clear acrylic create a sleek, high-end visual hierarchy that elevates residential dressing spaces.
- 5. Durable & User-Friendly Engineering:** Industrial-grade acrylic panels resist impact and scratches; soft-close sliding tracks ensure quiet, smooth operation for daily use.

FAQs (Focused on Customization & Urban Living)

- 1. Can the fluted acrylic panels be customized in terms of groove density or color?**

Yes. JAFFA offers fluted acrylic with customizable groove widths (5mm–20mm) and can match any RAL/Pantone color for the fluted panels, ensuring perfect alignment with your interior design.
- 2. Are the ultra-clear acrylic sliding doors easy to clean and resistant to fingerprints?**

Yes. We apply a nano anti-fingerprint and scratch-resistant coating to all clear acrylic surfaces, making them easy to wipe clean with a microfiber cloth and resistant to daily smudges.
- 3. Can this semi-open closet system be adapted for a corner installation in my bedroom?**

Absolutely. Our design team specializes in corner configurations, with custom mitered framing and sliding door tracks that maximize every inch of corner space without compromising functionality.
- 4. How do I ensure the closet's hanging rods and structure can support heavy winter clothing?**

All metal components (hanging rods, brackets, frames) are engineered for heavy loads (up to 50kg per linear meter for hanging rods). We will also reinforce key stress points based on your storage needs during the design phase.
