(I)Product Description

Custom Acrylic Desktop Bookends are specially designed for desks, office tables and studies, combining practicality and appearance. They are not only a good helper for organizing books, but also a simple aesthetic item to decorate the desktop. Made of art-grade high-transparency acrylic base material, it is light in texture but tough and durable. The transparent texture can perfectly integrate into various desktop styles, breaking the heaviness and monotony of traditional metal and wooden bookends. While keeping the desktop tidy and orderly, it adds more exquisite style.

Full-dimensional customization is supported. The size can be flexibly adjusted according to the desktop size and book height. It can be transparent, frosted, colored and other textures. It can be screen-printed with LOGO, engraved, and UV printed with patterns, suitable for personal desktops, corporate offices, campus stationery, brand customization and other scenarios. The one-piece molding process combined with rounded edge grinding design has no sharp edges and corners, making it safer to use, not easy to yellow or break, and still maintains a transparent texture after long-term use. It can easily store various books such as textbooks, picture books, documents and magazines, making the desktop tidy and orderly.

(II)Product Attributes

Attribute Category	Specific Parameters
Product Name	Custom Acrylic Desktop Bookends
Core Material	Art-grade high-transparency acrylic (PMMA), frosted acrylic, colored acrylic
Regular Size	20*15*10cm, 25*18*12cm, 30*20*15cm (Length*Height*Thickness, customizable)
Craft Highlights	One-piece molding, high-definition polishing, rounded edge grinding, seamless splicing (if splicing is needed)
Safety Performance	No sharp edges, impact-resistant (10-15 times that of glass), shatterproof, non-toxic and tasteless
Applicable Scenarios	Personal desks, offices, studies, campus classrooms, libraries, brand custom gifts
Service Life	10-15 years for indoor use, UV-resistant, not easy to yellow or fog
Cleaning Method	Wipe with clean water and a soft cloth; minor scratches can be repaired with polish

Accessories	Additional Accessories	Anti-slip pad, magnetic fixation, LED light strip, partition board	Anti-slip pad can be added at the bottom (to prevent sliding); magnetic type is suitable for metal desktops; LED type is suitable for decorative display	Smooth desktops, metal desktops, decorative displays, classified storage

(IV)FAQ

1. How is the load-bearing capacity of this acrylic bookend? Can it support thick books?

Answer: Strong load-bearing capacity. The regular 5mm thickness can easily support 30-50 ordinary books (about 5-8kg); if you need to store thick dictionaries and hardcover books, you can customize the 8-10mm thickened version, with a load-bearing capacity of more than 10kg, stable and not easy to tip over, and no deformation after long-term use.

2. Can I engrave words or print LOGO during customization? Is it suitable for batch customization as gifts?

Answer: Yes. Three processes are supported: laser engraving, screen-printed LOGO and UV printing. Names and mottos can be customized for engraving, and LOGO can accurately restore brand logos; batch customization is supported (minimum order quantity 20 pieces), and the unit price decreases with the increase of batch, suitable for corporate gifts, campus cultural and creative products, brand peripherals and other scenarios.

3. Are acrylic bookends easy to slide? How to fix them?

Answer: Not easy to slide. The bottom is anti-slip by default. Anti-slip pads can be added according to needs to increase friction, and it is stable and not shaking when placed on the desktop; magnetic type can be customized for metal desktops, which is more firmly adsorbed to avoid bookends shifting due to book extrusion.

4. Is it safe for children to use? Will there be sharp edges?

Answer: Absolutely safe. All bookends go through three rounds of edge grinding and polishing processes, and all edges are rounded (with a fillet radius $\geq 5\text{mm}$), without any sharp edges, avoiding children from bumping and getting hurt. It is suitable for children's desks, campus classrooms and other scenarios.
