

JAFFA Custom Made Checkered Color Blocking Acrylic Tissue Box

Our Product Introduction

for more products please visit us on custom-acrylicproducts.com

Basic Information

- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: L/C,D/P,T/T
- Supply Ability: 500sets/Year

Product Specification

- Material: PMMA
- Standard Size: Customizable
- Color: Customizable
- Feature: Luminous
- Service: OEM/ODM
- Application: Mall/Restaurant/Office/Home/Exhibition/Guar
- Highlight: **Custom Tissue Box acrylic, Checkered Acrylic Tissue Box, Block Acrylic Tissue Box**

JAFFA Grid Contrast Acrylic Tissue Box - Product Detail Page

Product Description

The JAFFA Grid Contrast Acrylic Tissue Box is crafted from high-transparency acrylic substrates, manufactured through precision mold opening, polishing, and laminating processes in our factory, combining industrial texture with home aesthetics. Adopting classic grid elements and contrast color design, paired with colored acrylic bead knobs, it features neat and transparent lines, as well as a stable and durable structure.

The box body is designed with a precise tissue extraction port for smooth pulling without jamming; the one-piece molding process effectively prevents corner cracking. The surface is scratch-resistant, wear-resistant, and easy to clean and maintain. We offer full-dimensional customization of **size, grid pattern, color, and LOGO**, which can adapt to tissue specifications for both household and commercial scenarios. It is not only a practical storage item but also a decorative product that enhances the spatial style, perfectly meeting the customization needs of high-end home furnishing and commercial spaces.

Design Inspiration

The design inspiration of this tissue box comes from the **collision between modern minimalism and retro grid aesthetics**. In the fast-paced era, people increasingly pursue "order" and "exquisiteness" in home spaces. As a classic visual symbol, grid patterns have inherent retro charm and visual hierarchy.

Combining JAFFA's in-depth experience in acrylic materials, the design team integrates the "lightness and transparency" of high-transparency acrylic with the "neat texture" of grid patterns, embellished with contrast color beads to break the monotony of monochrome acrylic. It not only continues the minimalist tone of modern home furnishing but also injects warmth and personality through retro grid patterns, transforming the daily-used tissue box from a "practical supporting role" into a "spatial highlight" and achieving a dual balance of function and appearance.

Scope of Application

Household Scenarios

Coffee tables in living rooms, dining tables in restaurants, bedside tables in bedrooms, vanities in bathrooms, and desks in studies. It is suitable for various home decoration styles such as modern minimalism, retro mix-and-match, and Nordic ins style.

Commercial Scenarios

High-end hotel guest rooms, chain homestays, brand coffee shops, internet-famous tea houses, clothing boutiques, office meeting rooms, reception areas of medical beauty institutions, and commercial exhibition halls. It can be used as an important soft decoration item to enhance the brand texture.

Customization Scenarios

Supporting co-branding customization with furniture brands, bulk procurement for soft decoration projects of design companies, and scenario-based customization for engineering clients. Brand LOGO can be engraved, and size and color can be adjusted according to needs to meet the personalized procurement needs of B-end clients.

Frequently Asked Questions (Q&A)

2. Q: What is the thickness of this acrylic tissue box? Is it easy to break?

A: The regular model uses 5mm high-transparency acrylic sheets, and the thickened model can be customized to 8-10mm specifications. The products have undergone impact resistance strengthening treatment in the factory, so they are not easy to break or deform under normal use, and their durability is far superior to ordinary acrylic products.

3. Q: What customization contents are supported? What is the minimum order quantity (MOQ)?

A: We support customization of size, grid color/pattern, bead knob color, and LOGO laser engraving/silk screen printing; the MOQ for regular models is 50 pieces, and the MOQ for engineering customized orders can be negotiated according to project requirements.

4. Q: Will the grid on the box body fall off? How to clean it daily?

A: The grid is integrally formed with acrylic sheets using imported laminating technology, and is not easy to fall off or fade after high-temperature curing treatment; for daily cleaning, wipe it with a soft cloth dipped in water or neutral detergent, and avoid scratching with sharp objects such as steel wool.

5. Q: Can the size of the tissue extraction port be adjusted? Can it adapt to large-size kitchen tissues?

A: The size of the tissue extraction port can be precisely customized according to the tissue specifications provided by the customer, supporting adaptation to various sizes such as large-size kitchen tissues and car mini tissues. Before customization, tissue samples or parameters can be provided, and we will issue an exclusive design plan.

6. Q: Are there any protective measures when the product is shipped? What if it is damaged during transportation?

A: Each product is individually wrapped with pearl cotton, paired with thickened corrugated cartons and anti-fall foam filling; if damage occurs during transportation, a free replacement service is available with photos of the damage, fully protecting the customer's rights and interests.
