JAFFA Mountain Shadow Acrylic Tissue Holder - Product Detail Page

Product Description

The JAFFA Mountain Shadow Acrylic Tissue Holder is crafted from high-transparency colored acrylic, using precision laser cutting and heat bending processes to condense the natural mountain contours into minimalist lines. The main body is made of food-grade safe acrylic, with edges finely polished for a warm and burr-free touch. The multi-layer color stacking design allows light to create gradient layers at different angles, combining transparency with visual tension.

The open structure adapts to various sizes of standard Western restaurant napkins and coffee square napkins, enabling easy access without jamming. The non-slip strip at the bottom ensures stability and prevents displacement, seamlessly integrating into the soft decoration aesthetics of modern catering spaces. We offer full-dimensional customization of **colors, sizes, mountain shapes, and brand LOGOs**, making it a desktop storage item that combines practicality and artistry, injecting a unique natural aesthetic into commercial spaces.

Design Inspiration

The design inspiration of this tissue holder stems from the **minimalist lines of natural mountains and the blank aesthetics of modern catering spaces**. In scenarios such as Western restaurants and coffee shops, people crave a moment of relaxation in the fast-paced consumption experience, and mountains, as a symbol of nature and tranquility, perfectly convey this emotion.

The design team abandoned complex decorations, using crisp geometric cuts to restore the undulating contours of mountains. Through the transparent properties of acrylic, light creates layered changes as it passes through, like the misty light on mountain peaks at dawn. It not only continues the minimalist tone of modern catering spaces but also injects a sense of relaxation through natural elements, turning the daily act of taking paper into a small ritual of dialogue with nature, achieving a deep integration of function and aesthetics.

Scope of Application (Commercial Venues such as Western Restaurants and Coffee Shops)

Western Restaurants

- **Tabletops:** Used as napkin storage, paired with cutlery and placemats to enhance dining ritual and spatial style.
- **Bar Areas:** Adapted to bar napkins, convenient for customers to pick up at will, while becoming a visual focal point of bar soft furnishings.
- **Waiting Areas:** Placed on front desks or waiting area tabletops to convey the brand's pursuit of details and aesthetics.

Coffee Shops / Tea Shops

- **Coffee Tables:** Paired with coffee cups and dessert plates to create a Nordic ins-style leisure atmosphere.
- **Pick-up Counters:** Used as square napkin storage to facilitate customer self-service and keep the tabletop tidy and orderly.
- **Internet-famous Check-in Areas:** As soft furnishing props, suitable for ins-style photo scenes to help with brand social communication.

Other Commercial Scenarios

- **Boutique Stores / Designer Home Stores:** As display props to enhance the artistic sense of the space.
- **Hotel Lobbies / Homestay Front Desks:** As napkin/tissue storage to convey high-end service texture.
- **Office Pantries:** Adapted to office tissues, balancing practicality and aesthetics.

Frequently Asked Questions (Q&A)

1. Q: What is the thickness of this acrylic tissue holder? Is it easy to deform?

A: The regular model uses 5mm high-transparency colored acrylic sheets, and the thickened model can be customized to 8-10mm specifications. After high-temperature setting and stress relief treatment, it is not easy to deform or fade under normal use, and its durability is far superior to ordinary acrylic products.

2. Q: What customization contents are supported? What is the minimum order quantity (MOQ)?

A: We support customization of colors (transparent, frosted, solid, etc.), mountain shapes, sizes, and brand LOGO laser engraving/silk screen printing. The MOQ for regular models is 50 pieces, and the MOQ for engineering customized orders can be negotiated according to project requirements.

3. Q: What sizes of napkins/tissues are compatible? Is it easy to tip over?

A: It is compatible with mainstream sizes such as standard Western restaurant napkins (23×23cm/33×33cm) and coffee square napkins (20×20cm). The bottom is equipped with non-slip silicone strips, and the structure has a stable center of gravity, so it is not easy to tip over during normal use. If you need to adapt to large-sized tissues, you can customize a widened base.

4. Q: How to clean it daily? Is it easy to scratch?

A: For daily cleaning, wipe it with a soft cloth dipped in water or neutral detergent, and avoid using sharp objects such as steel wool. The surface has undergone scratch-resistant and wear-resistant treatment, so it is not easy to produce obvious scratches under normal use. If higher protection is needed, a scratch-resistant coating can be customized.

5. Q: Are there any protective measures when the product is shipped? What if it is damaged during transportation?

A: Each product is individually wrapped with pearl cotton, paired with thickened corrugated cartons and anti-fall foam filling. If damage occurs during transportation, a free replacement service is available with photos of the damage, fully protecting the customer's rights and interests.
