

JAFFA Custom Acrylic Aquarium Underwater Tunnel, Panoramic Transparent Seabed Corridor, Viewing Passage for Aquarium/Theme Park

Our Product Introduction

for more products please visit us on custom-acrylicproducts.com

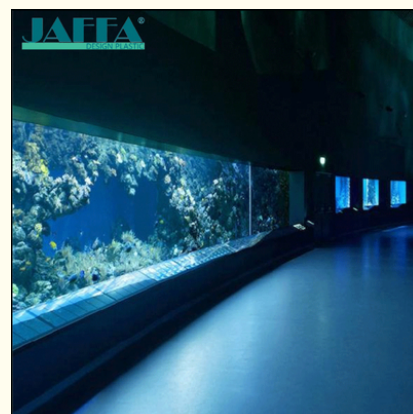

Basic Information

- Minimum Order Quantity: 5set
- Price: Negotiable
- Packaging Details: Wooden box packaging, cardboard box packaging
- Delivery Time: 7-10 work days
- Payment Terms: L/C,D/P,T/T
- Supply Ability: 500sets/Year

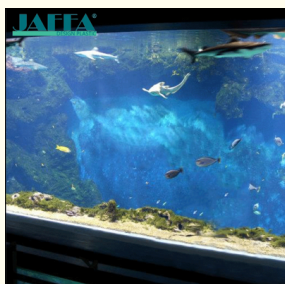

Product Specification

- Material: PMMA
- Standard Size: Customizable
- Color: Customizable
- Feature: Luminous
- Service: OEM/ODM
- Application: Mall/Restaurant/Office/Home/Exhibition/Guar

Product Description

Description

- **360° Panoramic Seabed Visual Design**: Adopts curved/cylindrical high-transparent acrylic panel to build underwater tunnel, realizing 360° dead-angle-free viewing, allowing visitors to be in the underwater world and have zero-distance contact with marine life such as fish and corals, which is the core internet-famous check-in facility for aquariums and theme parks.
- **High-Clarity Pressure-Resistant Acrylic Material**: Made of imported **marine special acrylic** with thickness 50–200mm, light transmittance up to 92%, seawater corrosion resistant, hydrolysis resistant, UV resistant, can bear 5–20 meters water pressure, no cracking or deformation after long-term immersion, complying with overseas marine engineering safety standards.
- **Modular Splicing Structure**: The tunnel is composed of multiple curved/cylindrical acrylic units + stainless steel skeletons in sections, customizable to straight, curved, circular and other shapes, adapting to marine parks and theme parks of different scales.
- **Professional Pressure-Bearing & Waterproof System**: Thickened acrylic panel + stainless steel reinforced keel + structural adhesive + waterproof sealing strip four-layer protection, which can bear seawater pressure and tidal change, effectively prevent water leakage, complying with overseas marine engineering safety codes such as ASTM/EN.
- **Multi-Scene Adaptability**: Can be used in large aquariums, aquaria, theme parks, water parks, cultural and tourist scenic spots and other scenarios, combining sightseeing, science popularization and artistic decoration functions.
- **Eco-Friendly & Safe Craftsmanship**: Adopts large-scale hot bending + fine polishing + sealing assembly, no odor or formaldehyde, acrylic material complies with EU ROHS environmental standards, and the edge is polished with rounded corners to avoid bump injuries.

Sample fee

Prepaid sample fee

The proofing fee will be refunded for bulk orders, and will not be charged if you are not satisfied.

Parameter Item (English)	Parameter Value (Customizable)
Material	Imported Marine Special Acrylic + 304/316 Stainless Steel Skeleton + Structural Adhesive + EPDM Sealing Strips
Color	Clear/Light Blue (Panel); Silver/Black (Skeleton)
Structure	Curved/Cylindrical + Modular Splicing
Standard Size	Diameter 2.5–5m × Single Section Length 3–10m (Adjustable)
Thickness	Acrylic Panel 50–200mm + Skeleton Wall Thickness 5–10mm
Craftsmanship	Large-Scale Hot Bending + Fine Polishing + Sealing Assembly
Weight Per Section	Approx. 500–2000 kg (Depends on Size)

Packaging Parameter Item	Custom Heavy Wooden Crate + Foam Cotton + Shockproof Pad (Shockproof) Parameter Value (Customizable)
(English) Installation Method	Embedded Part Fixing + Structural Adhesive Bonding + Waterproof Sealant Construction
Size Customization	Adjustable Diameter/Length/Curvature, MOQ: 1 Section
Form Customization	Customizable Straight/Curved/Circular/Irregular Shape
Material Customization	Customizable Panel Thickness/Light Transmittance; Skeleton Material/Color
Function Customization	Customizable Pressure-Bearing Grade/Light Transmittance/Anti-Collision Design
Safety Customization	Customizable Panel Thickness/Waterproof Grade/Fire Rating

PARTICULARITY

(Customized products, subject to the effect)
After cutting, it will affect the secondary sales.
If there is no quality problem, we don't support returning goods.
Thank you for your cooperation.

**If you need to return the goods, you will be charged 80%,
and the return postage will be borne by the buyer himself.**

I wish you a happy shopping!
If you have any questions.
Please contact our after-sales customer service.
We will give a reasonable treatment plan in time ~

About delivery

After the customer places an order,
the goods will be delivered within 1-3 working days under normal circumstances.
If the quantity is large or the process is complex,
the production cycle will be extended. If you have requirements for delivery time,
you can contact and negotiate.

About chromatic aberration

The product pictures are all real photos, but due to shooting technology,
light, display parameters and other factors.
The color of the received object will be different from the photo.
Please take the object as the standard.

About price

Because there are many specifications of raw materials,
please contact customer service for quotation for other specifications.
(The link price is for the convenience of customers to place an order, not the actual price of the product)

FAQ

1. How deep of seawater can this acrylic underwater tunnel bear?

Answer: Depending on the panel thickness, it can bear 5–20 meters of water pressure, fully meeting the conventional water depth requirements of aquariums and marine parks.

2. Is acrylic material resistant to seawater corrosion?

Answer: Adopts marine special hydrolysis-resistant acrylic, which is resistant to seawater corrosion and algae adhesion, no mildew, cracking or discoloration after long-term immersion in seawater.

3. How is the light transmittance compared to glass? Will it affect the viewing effect?

Answer: The light transmittance is up to 92%, close to the transparent effect of ultra-white glass, and acrylic has stronger toughness and is not easy to break, which is more suitable for underwater environment and can perfectly present the seabed landscape.

4. Does it support customization of curved or circular tunnels?

Answer: Yes, it can customize irregular tunnels such as curved, circular and wavy shapes through large-scale hot bending process, adapting to different aquarium design schemes.

5. Is installation and transportation complicated?

Answer: The modular sectional design can be disassembled for transportation, reducing logistics difficulty; it is installed on-site by a professional engineering team for embedded part fixing and sealing assembly, suitable for batch installation of large-scale cultural and tourism projects.

JAFFA
THE REASON FOR OUR CHOICE

ABOUT US

We are committed to providing customers with high-quality acrylic, plexiglass and resin plate products to meet the needs of various industries. Whether it's commercial display, interior decoration, advertising logo or home design, we can make it according to customer's requirements.

We have advanced production equipment and technical team, which can provide a variety of different processing technologies, including cutting, grinding, bending and bonding.

Ensure the accuracy and quality of products.

We also pay attention to innovation and research and development, and constantly introduce new products and designs to meet the needs and trends of the market.

In terms of installation, we have an experienced installation team, which can quickly and accurately complete the installation of products to ensure customer satisfaction and use effect.

Whether it is a business customer or an individual customer, we are committed to providing you with professional, efficient and high-quality services.

No matter what kind of products you need to customize.

We can make it according to your needs and requirements.

Ensure the quality and effect of products.
